**Investment Provider Fee and Expense Footnotes:**

- Note 1.** Includes deduction for mutual funds average expense rebates.
- Note 2.** Overall fee varies based on fund selection.
- Note 3.** Securities offered through Paradigm Equities, Inc. a wholly owned subsidiary of MEA Financial Services. ( See Additional Footnote Section-MEA)
- Note 4.** The Internal Fund Management Net Expense Ratio listed reflects the lowest and highest weighted average for the fund expenses of the underlying funds in the portfolios. The net expense ratio of the underlying fund is net of any applicable 12b-1 fee, which is refunded to your account.
- Note 5.** Surrender fees vary based on the annuity contract selected and period of time the contract is held. Surrender periods also vary from 0-7 years based on the annuity contract selected.
- Note 6.** Listed as a Gross Expense Ratio which includes the 1% M&E Fee. (See Additional Footnote Section-MEA)
- Note 7.** Surrender charge is waived for non-in plan exchange distributions. Waivers may apply for surrender charges incurred for internal exchanges with other MRIC vendors, please contact VALIC.
- Note 8.** Variable Annuities are long term investments and access may be limited if surrender charges apply and as a result of a 10% tax penalty on certain withdrawal. (See Additional Footnote Section-MEA)
- Note 9.** Cost of a \$10,000 portfolio was calculated by: Multiplying the \$10,000 investment by the highest and lowest internal fund management net expense ratios to determine the fund expenses in dollars and subtracting the fund expenses in dollars from \$10,000. The resulting number was then multiplied by all applicable fees reported by each provider. These included the following fees: advisory, participant, custodial, separate account, wrap, asset, M&E fee, and all other fees to determine the fees in dollars. Lastly the Third Party Administration fee was added to all other fees calculated to get a total estimate of annual fees charged on a \$10,000 portfolio. (e.g., \$10,000 investment \* 0.10% internal management net expense ratio = \$10 fund expenses; \$10,000 investment - \$10 fund expenses = \$9,990 investment net of fund fees \* 1.00% annual advisory fee = \$99.90 annual advisory fee; + \$50 for account service fee; \$10 internal management net expense ratio + \$99.90 advisory fee + \$50 account service fee = **\$159.90 annual cost of a \$10,000 portfolio**).
- Note 10.** Managed portfolios are diversified longterm investment strategies with an advisor who oversees the portfolio. Consider your risk tolerance goals when choosing a managed portfolio.
- Note 11.** Participants invested in an Annuity platform are advised to consider the benefits of an Annuity investment in accordance with their goals and risk tolerance. Participants selecting the Annuity should read the Annuity product information or prospectus for a full understanding of the costs, return guarantees, and the claims-paying ability of the issuing Annuity company, associated with variable and fixed annuities.
- Note 12.** Participants utilizing this self-directed mutual fund platform are advised to consider the benefits of constructing a well-diversified portfolio in accordance with their goals and risk tolerance. Participants selecting this option should be satisfied that they alone or with professional guidance possess adequate levels of investment knowledge and experience to make choices that are appropriate for their particular circumstances.
- Note 13.** Mutual Fund Platforms - These Represent the Highest Dollar Volume of Assets Under Management determined Annually as of 12/31/17.
- Note 14.** See Additional Footnote Section-GLP located at the back of the Report Card

**Loan Application & Processing Fees:**
